

# Service Starter Pack

A practical starter system for choosing, packaging, and delivering a beginner service.

StartScale • Learn. Build. Scale.

## 1. Pick a service

List 5 skills you already have: [1] [2] [3] [4] [5].

Circle the skill that solves a clear problem for another person.

Choose a service that can be delivered with tools and time you already have.

## 2. Create the offer

### Service

[SERVICE NAME]

### Customer

[WHO YOU HELP]

### Result

[WHAT THEY GET]

### Deliverables

[WHAT YOU ACTUALLY PROVIDE]

### Delivery time

[TIMEFRAME]

## 3. Client workflow

1. Customer contacts you.
2. You ask what they need.
3. You confirm scope, price, and delivery time.

4. Customer pays through your chosen payment system.
5. You complete the agreed work.
6. You deliver the result and request feedback.

## 4. Client intake questions

What are you trying to accomplish?

What do you already have?

What would a successful result look like?

What deadline are you working with?

Is there anything you specifically want included or avoided?

## 5. Simple outreach message

### Message

Hi! I help [TYPE OF CUSTOMER] with [SERVICE/RESULT]. I noticed [RELEVANT OBSERVATION]. If you're interested, I can explain what I would do and what it would cost.

For educational and practical use. Customize the examples for your own situation.
